### NOTES:

- When we register your domain you are assured that it will never expire. We manage our customer's domains in a master account to assure information is always correct and that we receive no less than 60 days advance notice of any pending renewals. You are, of course, welcome to register your own domain and manage renewals yourself, however, we cannot be responsible for loss of a domain name that was not renewed by you when it was due.
- Web design and setup provides basic design and graphics, working with our customers to assure they receive the look, navigation and functionality they require. Additional cost may apply for more elaborate design services. Shopping carts and CMS allow you to add unlimited content yourself at any time via your web browser. We recommend this for sites requiring constant updates or numerous features not available on static pages. We provide training on how to use your applications are always here to help out.
- Hosting fees payment options. You may elect to pay by cash, check or credit card. We do not bill monthly less than \$45. Monthly option is only available with credit card on file or by signing up using PayPal recurring billing feature.
- We use Open Source programs for most sites. This saves you money on licensed software. If you want or need a specific commercial application we can install that as well however you will remain responsible for any licenses for fees required by the authors.
- Discount for cash/check. Because of the increasing costs of accepting credit cards, we felt it would be unfair to increase costs to customers who pay by check to cover the business expenses for merchant account fees. By offering a discount for check & cash payments, only those who desire to use a credit card are paying for those costs. It keeps our over all prices low and assures the customer is paying only for services they use.
- We register and verify your site to Google and Yahoo and a number of other search engines and directories. We make no guarantee that your site will achieve any particular rank on any search engine. We can offer tips and suggestions to help you market your web site on line for maximum exposure.

#### Additional Services and products we offer:
